

CERAMIC RDC

Natural Stone Ceramic Radiator. Advanced Thermal Inertia.
INTEGRATED WIFI control, no need external wifi control unit.

Technical features

- **WIFI DIRECT:** Integrated G Control system for remote configuration and control of the radiator without the need for an external wifi switchboard.
- **Natural Ceramic technology**, natural stone core, which prolongs the heat thanks to its advanced thermal inertia.
- **ETCO electronic control optimiser** for electricity flow management.
- White backlit LCD display.
- **Individual daily and weekly programmer** with temperature level selector: Comfort, Economy and Anti-frost.
- Temperature selector with setpoint temperature display.
- **Open window detection** function.
- **"Adaptive Start"** control.
- **Geolocation** via internet connection.
- **Remote locking function** via the app.
- Compatibility with **voice control systems** with Amazon Alexa or Google Assistant.
- High sensitivity digital room thermostat $\pm 0.1^{\circ}\text{C}$.
- Keyboard lock function.
- Safety heat limiter.
- Adjustable digital thermometer.
- Straight design elements made of die-cast aluminium alloy with RAL 9010 epoxy finish.
- Possibility of configuration in manual mode with constant fixed temperature or in programmed mode with selection of temperatures by hours and days of the week.
- Supplied with mains cable.
- **Easy and quick installation.** Patented wall fixing brackets for quick and easy wall mounting without the need for a tape measure or levelling device.
- RDC6 and RDC9 compatible with castors offered as an accessory.
